

AMAZING PHOTOGRAPHIC DISCOVERY!

The
New
**SPiRiT
FiLTER**

My Neighbor Sally Mae kept complaining about her poor cell phone reception on foggy days. She claimed she heard weird noises and strange voices. I thought maybe she needed a vacation. That was until I took this photo.

There was a thick fog the other day when I saw her in the yard trying to make a cell phone call. There was also a peculiar light coming through the fog that I wanted to photograph, so I got my camera and decided to use the new **Spirit Filter** I got for Christmas.

When the photos came back from the lab I was astounded by what my **Spirit Filter** had captured! Sally Mae even more so, complaining that this was even worse than the bugs in her computer. I advised her that maybe a call to Ghost Busters was in order.

I just thought that I would share this amazing discovery with you. As always, I am available for your illustration and design projects using **QuarkXPress, Photoshop, Illustrator, InDesign, Go-Live, HTML, Acrobat**, and more. My new **Spirit Filter** is available as well!

And in case you are curious, I made this card for you using **Photoshop, Illustrator, InDesign, and Carrara Studio**.
